

## Case Study

**Client:** Milton Keynes College

**Project Date:** September 2018

Project Value: £70k

**Project Management Service including:** 

- Out of normal office hours work

- Space designs
- Standard and bespoke furniture
- Risk assessments & method statements

Modern and innovative reception refurbishment delivered to Milton Keynes College.

As part of a refurbishment programme, Milton Keynes College wanted to upgrade and refurbish the two reception areas at their Chaffron Way and Bletchley Campuses.

## The Brief:

The college wanted to modernise the areas and provide a sense of freshness to the open plan settings, whilst incorporating the improvement of site security with the installation of new security barriers.

MACOI listened to the college's aims and objectives and worked closely with our experienced fit-out team and reception desk manufacturer, to produce a proposal for an inspiring and modern look that projected the college's personality and culture at each site.

The refurbishment included new flooring, decoration, new partitioning, design, and installation of custom-made reception desks (including under-desk heaters for staff), and security desking.

## Testimonia

"We have worked closely with Andrew Ashall from MACOI for many years, so we were keen to see MACOI's ideas for upgrading and refurbishing our main reception areas at two of our busy campuses. The ideas and designs we received were excellent, with MACOI understanding exactly what we were looking to achieve from the offset.

Andrew and his installation team worked long hours to get everything completed on time, which was important to us as we needed to keep the closure of the reception area to a minimum whilst the project work was carried out. The projects were both completed successfully on time, and within budget, and we are delighted with the overall finish, products ,and services that MACOI has provided.

The feedback from students and staff has been very positive and we wouldn't hesitate to recommend the team to fellow educational establishments in the future."

Nathan Indge, Head of Estates & Infrastructure, Milton Keynes College
