

Case Study

Client: Pinnacle PSG / Penn Wood
Primary and Nursery School, Slough

Project Date: February 2019

Project Management Service including:

- Risk & Method Statements
- Delivery Schedule
- Bespoke Furniture
- Refurbishment Schedule

Source, supply, and refurbishment of vanity sink units at Penn Wood Primary and Nursery School in Slough.

As Facilities Managers to the PFI School, Pinnacle invited MACOI to source the replacement of purpose-built washroom units that could incorporate the reuse of existing plumbing, sinks, flooring, decoration, and accessories as part of the Schools life cycle refurbishment programme.

MACOI were appointed project managers, and as part of a complete 'turnkey' service, we provided the integral design of the vanity units that ensured all the pipework was safely and securely covered, complete with a full site survey and the removal of existing

materials. We sourced the supply from the original washroom providers, and our interior contractor installed the bespoke units to a boys and girls toilet area within the school.

The programme of works was successfully completed over the course of a half-term holiday to ensure minimal disturbance to the School and its pupils.

Testimonial

"The school are very happy with the 2 units supplied and fitted by your contractors. The work was carried out to the highest standards and the site left clean and tidy.

We will definitely be getting you back for work at our other schools".
