

Case Study

Client: Leading UK Toy Manufacturer

Project Date: May 2018

Project Value: £100k

Project Management Service including:

- Space planning & design
- Risk assessments & method statements
- Delivery & installation schedule

Dynamic and vibrant office furniture refurbishment to reflect established Toy Manufacturer's creative space.

Based on our proven track record and the desire of one of the UK's largest Toy Manufacturers to keep its business local with products solely from a British manufacturer, MACOI were delighted to be involved in the planning and refurbishment of their new premises in Cambridgeshire.

Following the initial project brief, key concepts were established that became part of the overall design, with the office furniture hand selected from the prestigious UK manufacturer, Elite Office Furniture.

Two stylish conference suites take pride of place in the new workplace, with co-ordinated tables and chairs to seat up to 20 people, and 40 revolutionary sit-stand height adjustable desks were supplied with under-desk cable management and pedestals with bespoke cushion pads, for informal one to one meetings.

With a delivery deadline of two weeks from receipt of order, MACOI offered a professional approach, with delivery and installation completed over a two day period. In addition to our streamlined approach, our project manager and installation team worked in partnership with Building Contractors, RG Carter Construction, to ensure the refurbishment was completed efficiently and effectively on a live industrial building site.

As the home to many leading brands, the striking new workspace is bright, welcoming and supports the collaborative style of working within a technology focused environment.
