**Project Value:** £4k

**Project Management Service including:**

- Space planning & design
- Bespoke whiteboards
- Risk & method statements
- Out of normal office hour works
- Delivery schedule

---

### Engaging students with frameless wall-mounted whiteboards.

MACOI were delighted to be involved in a supply, delivery and installation project for a busy University in the UK's capital city.

Working in partnership with requirements and guidelines from ITC Concepts, MACOI sourced durable whiteboards, which were all manufactured to bespoke sizes to perfectly fit teaching and learning areas within the busy University, with the smallest board length supplied is 2400 mm and the longest being 5000 mm.

The installation of all boards was completed over a weekend with a detailed delivery schedule provided to ensure we had access to all rooms. As part of our added value service, we removed and disposed of all previous standard size boards located throughout the University.
